COVID-19 and Cardiovascular Disease Management Webinar Series

As the global scope of the COVID-19 pandemic becomes clearer, we are learning more about its impact on cardiovascular health.

Join us this week to hear directly from cardiologists who played a pivotal role in treating patients during the initial outbreak in Wuhan, China, through a three-part webinar series in partnership with the Chinese Cardiovascular Association.

As we all work together on the front lines to best serve our patients, knowledge-sharing and collaboration are more essential than ever to helping our communities and patients recover from the novel coronavirus.

In the interim, as we continue to learn more about COVID-19, the ACC is working to provide clinical guidance to all members of the cardiovascular care team. [Stay up-to-date on the latest information from the ACC and other leading authorities in our COVID-19 Hub here.](#)

Webinar 1: Epidemiology, CVD Treatment & Management

Wednesday, March 18, 2020 | 8 am – 10 am EST

[**Register For the Webinar Here**](#)
